Program Description

This program allows users to add students, display student records, search students using binary search, and save or load information from a text file.

Concepts Used

- Data Types
- Data Sizes
- Arrays
- Strings
- Pointers
- Binary Search
- File I/O
- Classes

```
Student List
-----------------------
ID: 1203 Name: jianfeng Score: 20

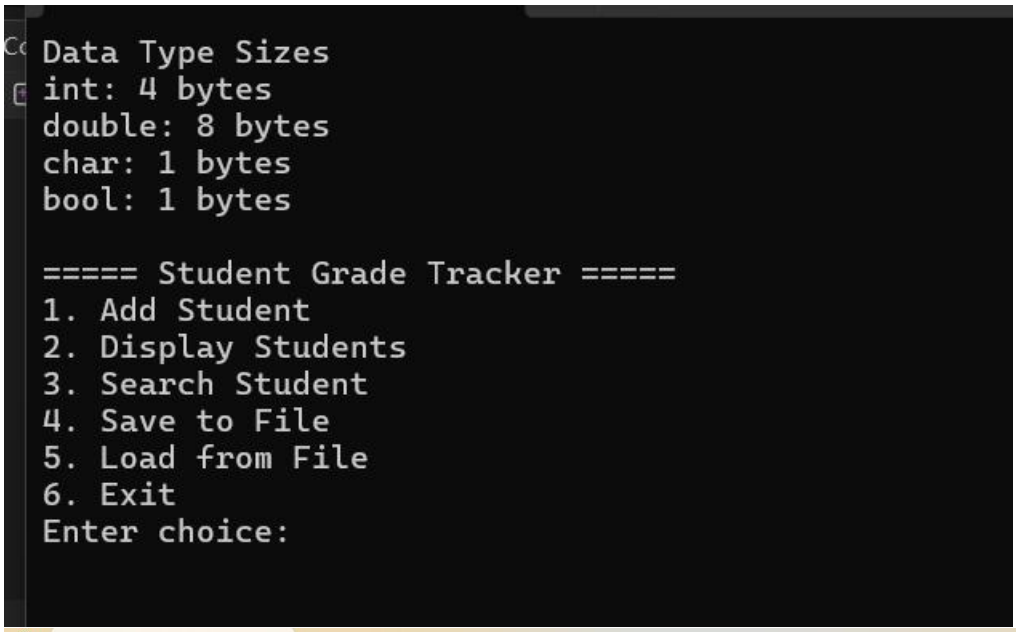

===== Student Grade Tracker =====
1. Add Student
2. Display Students
3. Search Student
4. Save to File
5. Load from File
6. Exit
Enter choice:
```

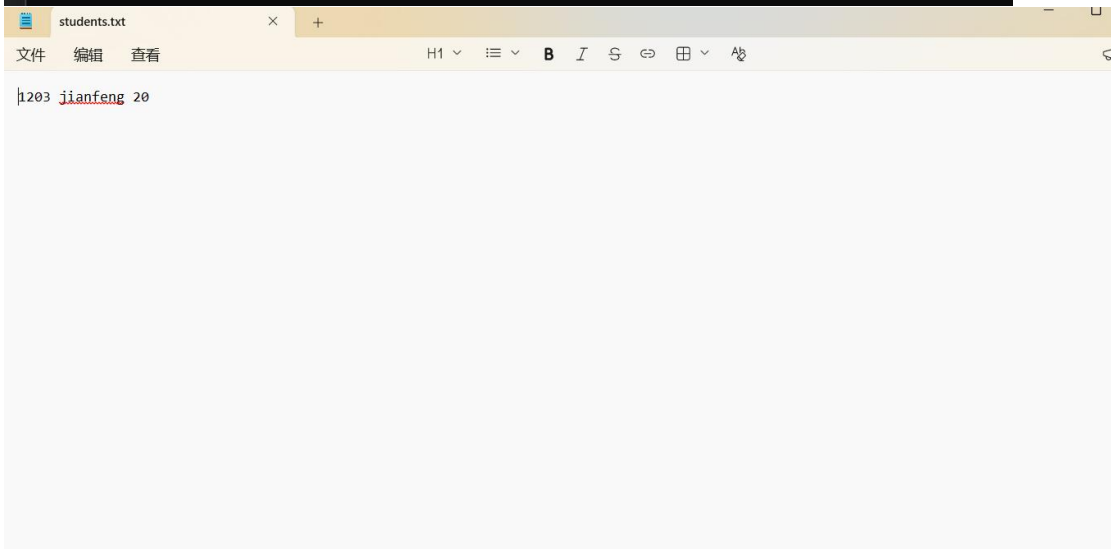

```
===== Student Grade Tracker =====
1. Add Student
2. Display Students
3. Search Student
4. Save to File
5. Load from File
6. Exit
Enter choice: 3
Enter ID to search: 1203

Student Found!
ID: 1203
Name: jianfeng
Score: 20
```

```
===== Student Grade Tracker =====
1. Add Student
2. Display Students
3. Search Student
4. Save to File
5. Load from File
6. Exit
Enter choice: 4
Data saved successfully.

===== Student Grade Tracker =====
1. Add Student
2. Display Students
3. Search Student
4. Save to File
5. Load from File
6. Exit
Enter choice: 5
Data loaded successfully.
```

Data Type Sizes
int: 4 bytes
double: 8 bytes
char: 1 bytes
bool: 1 bytes
